Individual translator

Other project specific teams

Why translate Ubuntu?

- Fix translation bugs in time for an Ubuntu release.
- Backport upstream translations.
- Harmonize translations accross Ubuntu.
- Translate native applications.

How translations get into Ubuntu?

ubuntu[®]

upstream projects

launchpad
source package

langpack-o-matic

ubuntu language pack

How translations get into Ubuntu?

translations

upstream
VCS

What is upstream and Downstream?

- Workflow of FOSS distribution is like a river.

Upstream relations.

Pros:

- Launchpad has friendly web interface for newcomers to pick up with.
- Many Ubuntu translators are also upstream translators.

Cons:

- Danger of wasted time by duplication of work.
- Lack of information to send translation upstream.

Upstream relations.

Ideal solutions:

- Participate upstream first, downstream second.
- Coordinate upstream and downstream work.
- Upstream use Launchpad.

Thanks!
